DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is incomplete in line 12. Claim 6 is vague with respect to the phrase "and others". Claim 7 lacks antecedence for "the subset" per se in step iii. In Claim 29, "responsive a user action" appears to be incomplete in step ii. Claim 32 appears to be incorrect, "patent" should be --patient-- in line 1. Claim 39 lacks antecedent basis for "the prescriber" in step C) i.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1-6 and 29-30 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US 5830150 to Palmer et al.

Claims 7-32, 34-35, and 37-39 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by US 5713350 to Yokota et al.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claims 33 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yokota et al. The Yokota et al. reference lacks a teaching of incorporating cost data into the information system. However, the Examiner takes Official Notice that the incorporation of cost related data into drug delivery/ medical information storage systems is well known in the art and the addition of such into the Yokota et al. device would have amounted to an obvious design expedient.

Allowable Subject Matter

Claim 40 is allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
